Technical Knowledge

Algorithms and Data Structure, Full Stack Web Development (MERN), React.js, Problem Solving Skills, DBMS, OS
Programming Language : C++
Also familiar with : Java, C, Javascript

PROJECTS

1. Student Movement Logbook

=> This is a web development project which can be used in hostels, libraries, schools and in all the places where we do entry in registers.

=> Technology used: Html, Css, Javascript for frontend and Php for backend.

=> We had also given a chance to show our project in District Level Science Model Competition on Science Day and we had got a certificate by the District Magistrate.

2. Millionaire Quiz App using React.js

=> This is a game app using react hooks.

=> This project is a time-pass quiz game in which for every correct answer we get a reward and for wrong answers we lose money.

=> In this I try to create logics for quiz setup and how to use setTimeout, useMemo hook, useEffect cleanup function and how to add sound to React App.

ACHIEVEMENTS

- ⇒ Certificate of participation in State Level Science Model Competition for Student Movement Logbook project.
- ⇒ Certificate for Problem Solving (Basics) on HackerRank.
